BARNES & THORNBURG LLP 11 SOUTH MERIDIAN INDIANAPOLIS, IN 46204				THERKORN, ERNEST G
ART UNIT		PAPER NUMBER		
		1723		

DATE MAILED: 10/20/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	10/646,125	NUROK ET AL.
	Examiner Ernest G. Therkorn	Art Unit 1723

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 04 October 2006.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) 3 and 4 is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1, 2, and 5-12 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) Notice of Informal Patent Application
- 6) Other: _____.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, and 5-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) in view of Perry (U.S. Patent No. 3,864,250). At best, the claims differ from Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998) in reciting use of pressure. Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) is concerned with the evaporation of mobile phase. Perry (U.S. Patent No. 3,864,250) (column 1, lines 45-51) discloses that heat controls the movement of solvent through the bed and pressure may be used to control evaporation. It would have been obvious to use a temperature controlled pressure chamber in Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) because Perry (U.S. Patent No. 3,864,250) (column 1, lines 45-51) discloses that heat controls the movement of solvent through the bed and pressure may be used to control evaporation.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) in view of Perry (U.S. Patent No. 3,864,250) as applied to claims 1, 2, and 5-12 above, and further in view of Stillian (U.S. Patent No. 5,248,426). At best, the claim differs from

Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) in view of Perry (U.S. Patent No. 3,864,250) in reciting use of foil. Stillian (U.S. Patent No. 5,248,426) (column 12, lines 38-41) discloses platinum foil electrodes prevent excessive resistive heating. It would have been obvious to use platinum foil electrodes in Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) in view of Perry (U.S. Patent No. 3,864,250) because Stillian (U.S. Patent No. 5,248,426) (column 12, lines 38-41) discloses platinum foil electrodes prevent excessive resistive heating.

Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) in view of Perry (U.S. Patent No. 3,864,250) as applied to claims 1, 2, and 5-12 above, and further in view of Tompa (U.S. Patent No. 4,671,870). At best, the claims differ from Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) in view of Perry (U.S. Patent No. 3,864,250) in reciting use of a temperature control device. Tompa (U.S. Patent No. 4,671,870) (column 5, lines 46-53) discloses that a temperature control device allows for temperature in a pressurized thin layer chromatography device. It would have been obvious to use a temperature control device in Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) in view of Perry (U.S. Patent No. 3,864,250) because Tompa (U.S. Patent No. 4,671,870) (column 5, lines 46-53) discloses that a temperature control device allows for temperature in a pressurized thin layer chromatography device.

The remarks urge the publication date of Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) is October 26, 1998 and urges that the earliest priority date of the application is October 25, 1999. However, the inventive entity listed on the article is different from the inventive entity listed on the patent application. In other word, the article qualifies as an activity "by another" before the invention by applicant. As such, the article is considered to be prior art.

The remarks urge that the examiner has failed to point out evidence of contribution to the claimed invention other than David Nurok and Megan Frost. However, Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246) lists Cary L. Pritchard and David M. Chenoweth as contributors to the subject matter described in Nurok (Journal of Planar Chromatography, Vol. 11, July/August 1998, pages 244-246).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to E. Therkorn at telephone number (571) 272-1149. The official fax number is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
